REFURBISHMENT OF 1970'S GYMNASIUM FLOOR AT WILLIAM COLENZO COLLEGE

FLOORING: Pulastic® Sports Floor

BUILDING TRUST

REFURBISHMENT OF 1970'S GYMNASIUM FLOOR AT WILLIAM COLENZO COLLEGE

Before Pulastic Sports Flooring was installed

Pulastic Sports Flooring

PROJECT DESCRIPTION

The 1970's school gymnasium at William Colenso College has seen many children come and go during its 40+ years. The gymnasium would no doubt have had a maintenance regime but wear and tear finally won - you can only sand timber floors so much before they wears away completely.

This 1970's gymnasium floor has had a complete face-lift to enable it to enjoy another 40+ years of PE sessions, basketball matches, volley ball tournaments, book fairs, performances, productions and a hundred other general school activities.

The new Pulastic Sports floor has been customised for the College - it is seamless, resilient, durable, sustainable, safe, comfortable and meets international standards.

Maintenance is made easy as you can replace and repair only the patches that need replacing or repairing or you can change the lines and colours and give it a completely new look.

PROJECT REQUIREMENT

- Resurface existing timber floor with Pulastic Sports flooring

CHALLENGES

- Work had to be scheduled so that there would be no interruptions to the school's everyday activities

- Attention had to be paid to the old timber floor - it could not be sanded any more as the timber was worn away
- Nails were popping - care needed to be taken here too
- Existing polyurethane coating needed to be replaced every five years due to lifting

PROJECT SIZE

555m²

SIKA SOLUTION

Pulastic Classic 70 (applied to timber underlay)

SIKA PRODUCTS

Regupol 6015 H 5mm thick rubber
Taclay ST
Pulastic EG porefiller
Pulastic GM 2000
Pulastic Coating-221 W

PROJECT PARTICIPANTS

Product Specifier: Judd Dougan Team Architecture
Main Contractor: New Zealand Specialised Coatings
